

DI
could

a trigger protruding from the lower portion of the circumferential surface of the oblong pipe-shaped body at a fixed position and angle, the trigger having a front surface, the front surface of the trigger sloping substantially toward a downward and backward direction relative to a rear end of the lower portion of the circumferential surface of the oblong pipe-shaped body and having a length such that at least two of an average size adult user's fingers can be placed thereon, wherein a center axis of the trigger is non-perpendicular with respect to a center axis of the fishing rod body; and

a rear body extending along the same axis as the fishing pole.

5. (Four Times Amended) A fishing rod, comprising:

a fishing rod body, on which line guides are mounted;

a reel seat;

42 a handle that extends backward from a position of the reel seat; and

a trigger protruding from a position opposite to a reel foot placing surface at a fixed position and angle, the trigger having a front surface, the front surface of the trigger sloping substantially downward and backward relative to a rear end of a lower portion of the reel seat and having a length such that at least two of an average size adult user's fingers can be placed thereon, wherein a center axis of the trigger is non-perpendicular with respect to a center axis of the fishing rod body; and

a rear body extending along the same axis as the fishing pole.
